Profile

Computer Science and Engineering graduate with hands-on experience in **Python, Django, JavaScript, REST APIs, and SQL**. Strong foundation in **Data Structures & Algorithms** and **Object-Oriented Programming**, with experience developing **full-stack web applications** and **database-driven solutions**.

Education

B.Tech in Computer Science and Engineering | University of Lucknow | 2022 – 2026 | 8.1 CGPA

Class XII (Senior Secondary) | Prasad International School | 2021-2022 | 75%

Class X (Secondary) | Prasad International School | 2019-2020 | 74%

Skills

Languages: Python, SQL.

Web Technologies: HTML5, CSS3, JavaScript.

Frameworks: Django

Tools: VS Code, Git/GitHub, Google Colab.

Databases: SQLite, MySQL

Training

Python Full Stack Trainee

TAP Academy | July 2026 – Present

- Undergoing hands-on training in **Python, Django, HTML5, CSS3, JavaScript, and SQL**.
- Developing web applications and working with **REST APIs** and database operations.
- Applying **OOP concepts, DSA, and problem-solving** through practical assignments and projects.
- Gaining practical experience in **full-stack web development**.

Projects

EasyIron | *Python, Django, JavaScript, HTML5, CSS3, SQLite, Django ORM* | [Link](#)

- Built EasyIron, a Django-based on-demand laundry platform featuring multi-role modules for customers, store staff, and delivery personnel.
- Designed and implemented end-to-end features including order booking, cart management, lifecycle status tracking, and administrative dashboards.
- Utilized Django ORM, SQLite, and JavaScript to handle database operations, role-based authentication, and dynamic, responsive user interface components.

E-Commerce Web Application | *Python, Django, HTML, CSS, JavaScript, Bootstrap, SQLite* | [Link](#)

- Developed a full-stack e-commerce web application using Django and MVT architecture, integrating secure user authentication, product management, and a seamless shopping cart checkout flow.
- Optimized database performance and data consistency by leveraging Django ORM to manage complex relational database operations and queries .
