Profile

B.Tech Computer Science graduate, Aspiring Software Engineer with core expertise in **DSA**, **Django backend development**, and **Machine Learning**. Passionate about building high-performance systems and applying analytical skills to solve intricate software challenges.

Education

B.Tech in Computer Science and Engineering | University of Lucknow | 2022 – 2026 | 8.1 CGPA

Class XII (Senior Secondary) | Prasad International School | 2021-2022 | 75%

Class X (Secondary) | Prasad International School | 2019-2020 | 74%

Skills

Languages: Python, Java, C, JavaScript.

Frameworks: Django, HTML.

AI/ML: Machine Learning, Deep Learning.

Tools: VS Code, Git/GitHub, Google Colab.

Project

EasyIron | *Python, Django, JavaScript, HTML5, CSS3, SQLite, Django ORM*

- Built EasyIron, a Django-based on-demand laundry platform featuring multi-role modules for customers, store staff, and delivery personnel.
- Designed and deployed end-to-end features including order booking, cart management, lifecycle status tracking, and administrative dashboards.
- Utilized Django ORM, SQLite, and JavaScript to handle database operations, role-based authentication, and dynamic, responsive user interface components.

E-Commerce Web Application | *Python, Django, HTML, CSS, JavaScript, Bootstrap, SQLite*

- **Developed** a full-stack e-commerce web application using **Django** and **MVT architecture**, integrating secure user authentication, product management, and a seamless shopping cart checkout flow.
- **Optimized** database performance and data consistency by leveraging **Django ORM** to manage complex relational database operations and queries

Experience

Software Development Intern

Rolling Stock Workshop, Northern Railway, Charbagh, Lucknow | *June 2025 – August 2025*

Technologies: Python, Django, SQLite, HTML, CSS, JavaScript, Bootstrap

- Developed a web-based data management system for trainee registration, feedback, training records, examinations, and marks.
- Implemented backend logic, database operations, and CRUD functionality using Django ORM.
- Improved administrative efficiency by digitizing manual record-keeping processes.

Certification

Artificial Intelligence | Samsung Innovation Campus | *Aug 2025 - Dec 2025* | [Link](#)

Machine Learning with Python | IBM via Coursera | [Link](#)

Supervised Machine Learning: Regression and Classification | DeepLearning.AI via Coursera | [Link](#)

Languages and Interests

Languages: Hindi, English | **Interests:** Environmental Sustainability (Tree Plantation)
